

OPUS CONSTRUCTION PRODUCT DATA

EASYSOLVE

Description

A blend of petroleum distillates, selected surfactants and chemical solvents. The product is designed to dissolve polystyrene including types used in concrete production i.e. Inserts and void formers. Using a minimum amount of solvent Opus Easysolve converts the residues into an emulsifiable solution which can be removed easily by washing off or wiping with a wet cloth. Opus Easysolve is an excellent degreaser and can be used to clean off oils, greases, waxes, etc.

Application

Opus Easysolve should be applied by non pressurised apparatus via a pouring spout. A minimum amount is required to dissolve quite large sections of polystyrene. Whilst the residues are still in liquid form, wash off with water or wipe with a wet cloth, should the residues be left for a period and solidify, reactivate with another application of Easysolve. After washing with water reinforcing bars can be cut without fear of ignition.

When handling Opus Easysolve use gloves as it is a powerful Degreasant and will dry out the skin (see Health & Safety data) and keep away from naked flames. Application details should be read in conjunction with our Health & Safety Data.

Properties

Appearance:	Clear, pale straw, low viscosity liquid
Specific Gravity:	0.895 @ 15.5°C
Flash Point:	47°C (PMCC)
Vapour Pressure:	<1mm Hg @ 20°C
Vapour Density:	Heavier than air
Control Level:	5mg/m ³ Max

Coverage

Approximately 10 x its own volume dissolving capacity.

Classification

EC Labeling regulations under category FLAMMABLE

Storage & Handling

Opus Easysolve is supplied in manufacturer's sealed containers of 25 litre and 205 litre capacity. The material contains flammable solvent based ingredients and must be handled in accordance with the Health & Safety Data Sheet for the product.

Fire Hazard

Extinguish with foam, dry chemical, CO2, fog, sand or earth, do not use water jet systems.

Health & Safety

Health & Safety datasheet is available on request from our office.
