

# OPUS LUBRICANTS PRODUCT DATA

## ELITE (Fuel Treatment and Enhancer)

### Description

**OPUS ELITE** is a high specification diesel and petrol additive designed to improve fuel consumption, clean and protect injectors whilst reducing harmful emissions and improving engine performance.

For application to all Diesel and Petrol engine road vehicles, trucks, buses, coaches, vans and cars.

### Benefits & Performance Levels

- 1 part of **Elite** to 2000 parts fuel treatment assures minimal treat cost.
- For best results add **Elite** directly to empty fuel tank prior to filling with fuel.
- Reduces fuel consumption typically by up 5%
- May be used in conjunction with reagents used in SCR systems, for the reduction of NOx emissions.
- Cleans injectors and fuel systems.
- Improves power output and engine performance.
- Prolongs component life.
- Disperses water and counteracts microbial growth in fuel and storage tanks.
- Protects components from the harmful effect of moisture droplets in the fuel.
- Suitable for application to Bio fuels, B5 to B100.

### Storage

All packages should be stored under cover. Where outside storage is unavoidable drums should be laid horizontally to avoid the possible ingress of water and the obliteration of drum markings. Products should not be stored above 60°C, exposed to hot sun or freezing conditions.
